Handbook of Global Optimization (Nonconvex Optimization and Its Applications) From Springer

Global optimization is concerned with the computation and characterization of global optima of nonlinear functions. During the past three decades the field of global optimization has been growing at a rapid pace, and the number of publications on all aspects of global optimization has been increasing steadily. Many applications, as well as new theoretical, algorithmic, and computational contributions have resulted.

The *Handbook of Global Optimization* is the first comprehensive book to cover recent developments in global optimization. Each contribution in the *Handbook* is essentially expository in nature, but scholarly in its treatment. The chapters cover optimality conditions, complexity results, concave minimization, DC programming, general quadratic programming, nonlinear complementarity, minimax problems, multiplicative programming, Lipschitz optimization, fractional programming, network problems, trajectory methods, homotopy methods, interval methods, and stochastic approaches.

The *Handbook of Global Optimization* is addressed to researchers in mathematical programming, as well as all scientists who use optimization methods to model and solve problems.

Editorial Review

Review

`... provide an impressive overview of the field of global optimization. ... clearly written ... coherent and comprehensive survey of the topic at hand ... woven the material together so that the relationships among the topics covered become evident. ... knowledge, insight and maturity that the authors bring to their respective topics make the book a pleasure to read. ... constitute an extraordinary sourcebook ... I highly recommend this outstanding volume to anyone interested in global optimization.'

Users Review

From reader reviews:

Rose Warfield:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite publication and reading a reserve. Beside you can solve your condition; you can add your knowledge by the book entitled Handbook of Global Optimization (Nonconvex Optimization and Its Applications). Try to make book Handbook of Global Optimization (Nonconvex Optimization and Its Applications) as your friend. It means that it can to be your friend when you sense alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you considerably more confidence because you can know almost everything by the book. So , let me make new experience and also knowledge with this book.

Janice Burgess:

The book Handbook of Global Optimization (Nonconvex Optimization and Its Applications) make you feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can to become your best friend when you getting stress or having big problem with the subject. If you can make reading a book Handbook of Global Optimization (Nonconvex Optimization and Its Applications) to become your habit, you can get a lot more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You can know everything if you like open up and read a reserve Handbook of Global Optimization (Nonconvex Optimization and Its Applications). Kinds of book are several. It means that, science publication or encyclopedia or other individuals. So , how do you think about this publication?

Jon Gonzalez:

Typically the book Handbook of Global Optimization (Nonconvex Optimization and Its Applications) will bring you to definitely the new experience of reading some sort of book. The author style to clarify the idea is very unique. In the event you try to find new book to see, this book very suited to you. The book Handbook of Global Optimization (Nonconvex Optimization and Its Applications) is much recommended to you to see. You can also get the e-book from the official web site, so you can quicker to read the book.

Jacqueline Carter:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is prepared or printed or outlined from each source that will filled update of news. In this particular modern era like today, many ways to get information are available for a person. From media social including newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just in search of the Handbook of Global Optimization (Nonconvex Optimization and Its Applications) when you desired it?
