Learning Strabismus Surgery: A Case-Based Approach By Dean M. Cestari, David G. Hunter

Ideal for both the student seeking a firmer understanding of strabismus surgery and the experienced surgeon looking to improve clinical decision-making, this practical resource uses a case-based approach to help readers conceptualize, plan, and perform complex strabismus procedures at every difficulty level.

With this handy reference, you'll examine complex cases—each with a unique set of clinical findings—then analyze the information, choose a surgical approach, and make a detailed plan for the procedure, all the while being guided by the steady hands of experienced strabismus surgeons.

At the end of each case you'll review the findings and think about what worked – and what could have been done better. Then you'll take a short-answer quiz to lock in the key concepts.

This is the tablet version which does not include access to the supplemental content mentioned in the text.

Editorial Review

Review

“In summary, this book is like no other in the field in that it uncovers the thought process for decision making of expert strabismus surgeons in a very wide range of clinical and surgical situations. A step beyond atlases, no other source in the field provides access to a video collection.”

“Reading this book is indeed the closest you can get to attending a strabismus fellowship”

- American Journal of Ophthalmology (August 2013)
- Reviewed by Monica M. Pacheco, Rockville, MD

Users Review

From reader reviews:

Pearl McLean:
