Military Adaptation in Afghanistan (Stanford Security Studies) From Stanford Security Studies

When NATO took charge of the International Security Assistance Force (ISAF) for Afghanistan in 2003, ISAF conceptualized its mission largely as a stabilization and reconstruction deployment. However, as the campaign has evolved and the insurgency has proved to more resistant and capable, key operational imperatives have emerged, including military support to the civilian development effort, closer partnering with Afghan security forces, and greater military restraint. All participating militaries have adapted, to varying extents, to these campaign imperatives and pressures. This book analyzes these initiatives and their outcomes by focusing on the experiences of three groups of militaries: those of Britain, Canada, Denmark, the Netherlands, and the US, which have faced the most intense operational and strategic pressures; Germany, who's troops have faced the greatest political and cultural constraints; and the Afghan National Army (ANA) and the Taliban, who have been forced to adapt to a very different sets of circumstances.

Editorial Review

Review

"*Military Adaptation in Afghanistan* provides an excellent encapsulation of the learning and adaptation that have occurred over the course of that conflict. It will serve as an excellent resource for military practitioners, historians, political scientists, and policy makers alike." (Daniel Marston, Principal, Military and Defense Studies Program)

"In *Military Adaptation and the Afghanistan War*, contributing editors Theo Farrell, Frans Osinga, and James Russell have very effectively focused a select yet diverse group of expert authors to craft a coherent and timely analysis of tactical, operational, and strategic adaptation in Afghanistan. This is the first and only book that examines the war in Afghanistan through the lens of adaptation across such a range of military organizations. All security practitioners and scholars should indeed read this insightful book because it is exceedingly salient and it highlights the grave consequences of not adapting or adapting too slowly at war." (Colonel Robert Cassidy, author of *War, Will*)

"Overall, this book is the rarest of breeds, an integrated anthology of experts consistently applying a well-designed analytical framework. From this broad collection of different authors, a number of clear and reasonable conclusions were drawn. The writing is crisp, detailed and informed, and the editing obviously disciplined. Both the analytical framework and its execution reveal unique insights on contemporary conflict in general, and the character of military adaptation in complex irregular contingencies. The utility of this volume to ongoing debates about the future utility of force and the challenge of irregular warfare is evident. It will also be useful for NATO military leaders interested in gaining competitive advantage in future conflicts, and anyone seeking to avoid refighting the last war. Given the breadth of issues raised about contemporary conflict and the enormous value of the complexities of coalition warfare, this book will be valuable for interdisciplinary students, scholars of strategic studies and international students of warfare. Accordingly, it is highly endorsed and enthusiastically recommended for extended examination and follow-on studies." (Frank Hoffman *International Politics Reviews*)

About the Author

Theo Farrell is Professor of War in the Modern World at King's College London. Frans Osinga is an Air Commodore in the Royal Netherlands Air Force and a Professor at the Royal Netherlands Defence Academy. James Russell is an Associate Professor at the Naval Post Graduate School, Monterey.

Users Review

From reader reviews:

Joni Griffith:

Reading a reserve can be one of a lot of pastime that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new information. When you read a publication you will get new information simply because book is one of numerous ways to share the information or even their idea. Second, reading a book will make you more imaginative. When you studying a book especially fictional book the author will bring one to imagine the story how the figures do it anything. Third, you can share your knowledge to other individuals. When you

read this Military Adaptation in Afghanistan (Stanford Security Studies), you are able to tell your family, friends and also soon about your guide. Your knowledge can inspire average, make them reading a publication.

Deborah Browning:
