**Agent of Byzantium** By Harry Turtledove

**A dashing master spy takes on the enemies of the Byzantine Empire and discovers impossible inventions like gunpowder and telescopes in a magnificent romp from the maestro of alternate-history science fiction**

In another, very different timeline—one in which Mohammed embraced Christianity and Islam never came to be—the Byzantine Empire still flourishes in the fourteenth century, and wondrous technologies are emerging earlier than they did in our own. Having lost his family to the ravages of smallpox, Basil Argyros has decided to dedicate his life to Byzantium. A stalwart soldier and able secret agent, Basil serves his emperor courageously, going undercover to unearth Persia's dastardly plots and disrupting the dark machinations of his beautiful archenemy, the Persian spy Mirrane, while defusing dire threats emerging from the Western realm of the Franco-Saxons. But the world Basil so staunchly defends is changing rapidly, and he must remain ever vigilant, for in this great game of empires, the player who controls the most advanced tools and weaponry—tools like gunpowder, printing, vaccines, and telescopes—must certainly emerge victorious.

A collection of interlocking stories that showcase the courage, ingenuity, and breathtaking derring-do of superspy Basil Argyros, *Agent of Byzantium* presents the great Harry Turtledove at his alternate-world-building best. At once intricate, exciting, witty, and wildly inventive, this is a many-faceted gem from a master of the genre.

### **Editorial Review**

From Publishers Weekly

In the alternate medieval history Turtledove proposes, in this third novel in the Isaac Asimov Presents series, Muhammed's conversion to Christianity in lieu of founding Islam allows the Roman Empire to flourish and expand. This makes for a more peaceful, but also more static, age. Basil Agyros is an imperial commander of scouts in the latest barbarian skirmish when he proves his worth by retrieving the magical instrument with which the enemy divined Roman strategy at a distancea newly invented telescope. Promoted to bureaucrat in Constantinople, he acts as troubleshooter and 14th century scientific detective. The episodes betray their origin as separate stories and beg plausibility with Basil's stumbling on inventions from gunpowder to printing, but these intelligent, colorful tales honorably recall L. Sprague de Camp, the master of historical SF whom Turtledove invokes in his preface.
