**Undeniable: How Biology Confirms Our Intuition That Life Is Designed** By Douglas Axe

**Named A Best Book of the Year by *World Magazine***

Throughout his distinguished and unconventional career, engineer-turned-molecular-biologist Douglas Axe has been asking the questions that much of the scientific community would rather silence. Now, he presents his conclusions in this brave and pioneering book. Axe argues that the key to understanding our origin is the “design intuition”—the innate belief held by all humans that tasks we would need knowledge to accomplish can only be accomplished by someone who has that knowledge. For the ingenious task of inventing life, this knower can only be God.

Starting with the hallowed halls of academic science, Axe dismantles the widespread belief that Darwin’s theory of evolution is indisputably true, showing instead that a gaping hole has been at its center from the beginning. He then explains in plain English the science that proves our design intuition scientifically valid. Lastly, he uses everyday experience to empower ordinary people to defend their design intuition, giving them the confidence and courage to explain why it has to be true and the vision to imagine what biology will become when people stand up for this truth.

Armed with that confidence, readers will affirm what once seemed obvious to all of us—that living creatures, from single-celled cyanobacteria to orca whales and human beings, are brilliantly conceived, utterly beyond the reach of accident.

Our intuition was right all along.

### Editorial Review

#### Review

“From childhood everyone directly grasps that life is designed - until they’re talked out of it by a culture saturated with materialism. Using the latest science, molecular biologist Douglas Axe shows why you don’t have to be an expert to trust your firm knowledge of the wonderful design of life.” (**Michael J. Behe, author of *Darwin’s Black Box***)

“*Undeniable* is an important addition to the debate on the origins of life. It provides a middle way between religious and scientific explanations of how life began. A must-read for everyone who is interested in the origins of our universe.” (**The Washington Book Review**)

“Great scientists are as much artists as scientists. Enchanted by the beauty of the world, they see through ideologies to facts. In this engaging book, Axe uses ‘common science’ to consider the biggest mystery: To what or to whom do we owe our existence? I greatly enjoyed it.” (**Dean Koontz, New York Times bestselling author**)

“Douglas Axe’s *Undeniable* is bold, insightful and world-changing. It’s also a joy to read. I recommend it highly!” (**Phillip E. Johnson, Professor Emeritus of Law at U. C. Berkeley and author of *Darwin on Trial***)

“Highly rigorous yet passionate, lyrical, forthright, refreshingly brief and accessible, *Undeniable* is an urgently needed addition to the library of books on intelligent design.” (**Evolution News**)

“In *Undeniable* we are privy to a first-hand account of the evidence for intelligence and the painful professional cost of swimming against the flow of accepted but un-proven truth. A must-read.” (**Gerald Schroeder, author of *The Science of God and God According to God***)

“Microbiologist Douglas Axe makes a case for intelligent design over and against the dominant secular materialism that pervades the scientific community. Whether one is an atheist, agnostic, or a theist, *Undeniable* adds another exciting voice to a lively debate.” (**Reading Religion, A Publication of the American Academy of Religion**)

“Probably the most engaging book I have read in the past ten years, because of Dr. Axe’s clear explanations and profound insights. This is an important book, perhaps the best one in existence, for anyone who takes origins questions seriously, whatever their perspective.” (**Chuck Garner, Professor of Organic Chemistry at Baylor University**)

“Axe has carefully crafted a case that strongly favors our human intuition that life was designed, demonstrating why unguided evolution is improbable in the extreme. This book’s power to convince surpasses that of everything I’ve read on origins science in my sixty-five years as an engineer, biophysicist, and physiologist.” (**Mark C. Biedebach, Ph.D., Professor Emeritus, Dept. of Biological Sciences, California State University, Long Beach**)

“*Undeniable* makes a compelling case by a molecular biologist that living organisms were designed by an intelligent agent, i.e. God. A decisive blow at the foundations of the materialistic explanations of the origin

and diversity of life's forms that have dominated biology for 200 years.” (**Donald Ewert, PhD, Director of Research at the Hough Ear Institute and Former Wistar Institute Research Scientist**)

“Douglas Axe is one of the very few experimental scientists who has used his skills to test the validity of evolutionary mechanisms as a source of inventions. Here, he concludes that we can trust our common [universal] design intuition; it is supported by science, whereas evolutionary stories are anti-science.” (**Matti Leisola, D.Sc. Professor Emeritus of Bioprocess Engineering, Aalto University, Finland**)

“Many say we must accept that life is ultimately due to a grand cosmic accident, that evolution is an unguided purposeless process and that we must deny our experience. Axe describes why the design we see in nature fits with scientific observation as well as with our ‘undeniable’ experience.” (**Russell W. Carlson, Professor Emeritus, Department of Biochemistry & Molecular Biology, University of Georgia**)

“Axe performs a remarkable act of intellectual jiu-jitsu, finding evidence of design in the uttermost molecular details of life, those that were supposed to banish antiquated notions of design. No matter what side of the design debate you happen to be on, it’s worth reading, engaging and debating.” (**J Scott Turner, Professor of Biology, SUNY ESF, Syracuse, New York**)

“*Undeniable* is a marvelous book, both engaging and convincing—a true masterpiece.” (**Marcos Eberlin, Professor of Chemistry at University of Campinas, member of the Brazilian Academy of Sciences**)

“‘Religion vs. science’ conflicts are generally depicted in popular culture as battles between narrow-minded bigots and tolerant truth-seekers. In recent decades, though, this narrative has arguably been turned on its head. Douglas Axe knows this first-hand, and in *Undeniable*, presents his objections to the theory of evolution.” (**The Jewish Press**)

Whether one is an atheist, agnostic, or a theist, *Undeniable* adds another exciting voice to a lively debate. (**Reading Religion**)

From the Back Cover

“*To what or to whom do we owe our existence?* This has to be the starting point for people who take life seriously—whether scientists or not. We cannot rest without the answer because absolutely everything of importance is riding on it.”—from *Undeniable*

Throughout his distinguished and unconventional career, engineer-turned-molecular-biologist Douglas Axe has been asking the questions that much of the scientific community would rather silence. Now, he presents his conclusions in this brave and pioneering book. Axe argues that the key to understanding our origin is the “design intuition”—the innate belief held by all humans that tasks we would need knowledge to accomplish can be accomplished only by someone who has that knowledge. For the ingenious task of inventing life, this knower can only be God.

Starting with the hallowed halls of academic science, Axe dismantles the widespread belief that Darwin’s theory of evolution is indisputably true, showing instead that a gaping hole has been at its center from the beginning. He then explains in plain English the science that proves our design intuition scientifically valid. Lastly, he uses every-day experience to empower ordinary people to defend their design intuition, giving them the confidence and courage to explain why it must be true and the vision to imagine what biology will become when people stand up for this truth.

Armed with that confidence, readers will affirm what once seemed obvious to all of us—that living

creatures, from single-celled cyanobacteria to orca whales and human beings, are brilliantly conceived, utterly beyond the reach of accident.

Our intuition was right all along.

#### About the Author

Douglas Axe is the director of Biologic Institute, a nonprofit research organization launched by Discovery Institute in Seattle, Washington. His work and ideas have been featured in many scientific journals, including the Journal of Molecular Biology, the Proceedings of the National Academy of Sciences, and Nature.

Neil Hellegers is a narrator, actor, and educator who lives in Brooklyn, New York. His voice work can be heard during various commercials, sundry video games, and in numerous audiobooks. Neil has appeared in films, TV shows, and commercials, and has performed and taught Shakespeare to students of all ages.

### Users Review

#### From reader reviews:

##### **Jackson Ponce:**

Book will be written, printed, or illustrated for everything. You can learn everything you want by a reserve. Book has a different type. We all know that that book is important issue to bring us around the world. Close to that you can your reading expertise was fluently. A publication Undeniable: How Biology Confirms Our Intuition That Life Is Designed will make you to become smarter. You can feel more confidence if you can know about every little thing. But some of you think in which open or reading a new book make you bored. It is not make you fun. Why they might be thought like that? Have you seeking best book or suitable book with you?

##### **Pat Billings:**

As people who live in often the modest era should be update about what going on or facts even knowledge to make these people keep up with the era which can be always change and progress. Some of you maybe will update themselves by studying books. It is a good choice to suit your needs but the problems coming to you is you don't know what one you should start with. This Undeniable: How Biology Confirms Our Intuition That Life Is Designed is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

##### **Carolyn Franklin:**

Are you kind of hectic person, only have 10 or even 15 minute in your moment to upgrading your mind ability or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your short space of time to read it because this all time you only find book that need more time to be read. Undeniable: How Biology Confirms Our Intuition That Life Is Designed can be your answer mainly because it can be read by you actually who have those short extra time problems.

**Kerry Giles:**

As we know that book is important thing to add our understanding for everything. By a e-book we can know everything we want. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This publication Undeniable: How Biology Confirms Our Intuition That Life Is Designed was filled in relation to science. Spend your extra time to add your knowledge about your science competence. Some people has diverse feel when they reading some sort of book. If you know how big selling point of a book, you can sense enjoy to read a book. In the modern era like now, many ways to get book which you wanted.
