**A Photographic Atlas for the Botany Laboratory** By Samuel R. Rushforth, Robert R. Robbins, John L. Crawley, Kent M. Van De Graaff

This full-color photographic atlas provides clear photographs and drawings of tissues and organisms similar to specimens seen in a botany laboratory. It is designed to accompany any botany (or biology) text or laboratory manual used in the classroom. It provides a balanced visual representation of the major groups of botanical organisms. Care has been taken to construct completely labeled, informative figures and parts of organisms are depicted clearly and accurately. The terminology used matches that found in college botany texts, student versions of this title are three-hole drilled and in loose-leaf format.
