### Insects of Hawaii Vol. 17: Hawaiian Hylaeus (Nesoprosopis) Bees (Hymenoptera : Apoidea) By Howell V. Daly, Karl N. Magnacca

This volume of *Insects of Hawaii* is a systematic treatment of the native bees of the Hawaiian Islands. Believed to be descendants of a single female that arrived in the ancient archipelago millions of years ago, the native yellow-faced bees are prime examples of extraordinary evolutionary radiation. Despite their evolutionary and ecological importance, no comprehensive work has been published on them until now.

A total of fifty-nine species are recognized, including nine new species. Detailed keys for the identification of species are provided for males and, for the first time, females. The history of collections of the bees, their taxonomy, attributes for dispersal, biology, ecology, and relations to flower plants are discussed. Treatments of each species include annotated synonymy and other references; diagnosis of identifying features and general distribution; description of male and female; localities where first collected and recent collections; flower records; and remarks on taxonomic problems and other information. Line drawings of the male head and genitalia are included to facilitate identification, and all recent collection records are provided in an appendix. 67 illus.

## **Editorial Review**

### **Review**

"This is a fine revisional study, complete with a morphological account, descriptions, illustrations of faces, male genitalia and sterna, collection records, keys for identification. . . . The data in this revisional study should serve as the basis for studies of phylogeny, speciation events, dispersal among islands. . . . It is encouraging to know that the Insects of Hawaii series, begun in 1948 by Elwood C. Zimmerman, continues to make known the remarkable insect fauna of the Hawaiian Islands."

## **Users Review**

### **From reader reviews:**

#### **Albert Aucoin:**

Nowadays reading books be than want or need but also turn into a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The details you get based on what kind of e-book you read, if you want get more knowledge just go with schooling books but if you want experience happy read one using theme for entertaining including comic or novel. Typically the Insects of Hawaii Vol. 17: Hawaiian Hylaeus (Nesoprosopis) Bees (Hymenoptera : Apoidea) is kind of book which is giving the reader erratic experience.

#### **Fran Short:**

The publication untitled Insects of Hawaii Vol. 17: Hawaiian Hylaeus (Nesoprosopis) Bees (Hymenoptera : Apoidea) is the book that recommended to you you just read. You can see the quality of the book content that will be shown to anyone. The language that writer use to explained their way of doing something is easily to understand. The author was did a lot of study when write the book, hence the information that they share for your requirements is absolutely accurate. You also will get the e-book of Insects of Hawaii Vol. 17: Hawaiian Hylaeus (Nesoprosopis) Bees (Hymenoptera : Apoidea) from the publisher to make you much more enjoy free time.

#### **Erica Lewis:**

Many people spending their time period by playing outside with friends, fun activity together with family or just watching TV the entire day.
