## Philosophy of Religion: Thinking About Faith (Contours of Christian Philosophy) By C. Stephen Evans, R. Zachary Manis

With over 40,000 copies in print since its original publication in 1982, Steve Evans's *Philosophy of Religion* has served many generations of students as a classic introduction to the philosophy of religion from a Christian perspective. Over the years the philosophical landscape has changed, and in this new edition Zach Manis joins Evans in a thorough revamping of arguments and information, while maintaining the qualities of clarity and brevity that made the first edition so appreciated. New material on divine foreknowledge and human freedom has been added as well as on Reformed epistemology. The discussions on science now cover new developments from cognitive psychology and naturalism as well as on the fine-tuning of the cosmos. The chapter on faith and reason has been expanded to include consideration of evidentialism. The problem of evil now forms its own new chapter and adds a discussion of the problem of hell. The standard features remain: a survey of the field, an examination of classical arguments for God's existence, and an exploration of contemporary challenges to theism from the social sciences and philosophy as well as the natural sciences. The meaning and significance of personal religious experience, revelation and miracles--all within the realm of contemporary religious pluralism--are likewise investigated. A classic introduction thoroughly updated and refreshed for today's student.
