## The Postmodern Adventure: Science, Technology, and Cultural Studies at the Third Millennium By Steven Best PhD, Douglas Kellner

Massive geopolitical shifts and dramatic developments in computerization and biotechnology are heralding the transformation from the modern to the postmodern age. We are confronted with altered modes of work, communication, and entertainment; new postindustrial and political networks; novel approaches to warfare; genetic engineering; and even cloning. This compelling book explores the challenges to theory, politics, and human identity that we face on the threshold of the third millennium. It follows on the success of Best and Kellner's two previous books: *Postmodern Theory*, acclaimed as the best critical introduction to the field, and *The Postmodern Turn*, which provides a powerful mapping of postmodern developments in the arts, politics, science, and theory. In *The Postmodern Adventure*, Best and Kellner analyze a broad array of literary, cultural, and political phenomena--from fiction, film, science, and the Internet, to globalization and the rise of a transnational image culture. They use the best of modern and postmodern perspectives to illuminate contemporary life and to strive for a just and viable future.

Gold Medal Winner in Philosophy--ForeWord Magazine's Book of the Year Awards
