The Toxicology and Biochemistry of Insecticides, Second Edition By Simon J. Yu

Despite their potentially adverse effects on nontarget species and the environment, insecticides remain a necessity in crop protection as well as in the reduction of insect-borne diseases. **The Toxicology and Biochemistry of Insecticides** provides essential insecticide knowledge required for the effective management of insect pests.

Continuing as the sole book in more than two decades to address this multifaceted field, the **Second Edition** of this highly praised review on insecticide toxicology has been greatly expanded and updated to present the most current information on:

- Systemic classification of insecticides
- How insecticides function at the molecular level and newly discovered modes of action
- Insecticide resistance, molecular mechanisms, fitness costs, reversion, and management of resistance
- Various bioassay methods including the interpretation of probit analysis
- Molecular mechanisms of insecticide selectivity
- Major biochemical mechanisms involved in the transformation of insecticides
- Fate of insecticides in the environment and the sublethal effects of insecticides on wildlife
- Newly developed insecticides, including the addition of more microbial insecticides in keeping with current integrated pest management (IPM) approaches

Incorporating extensive reference lists for further reading, **The Toxicology and Biochemistry of Insecticides, Second Edition** is an ideal textbook for students of entomology, plant medicine, insecticide toxicology, and related agricultural disciplines. It is also a valuable resource for those involved in insecticide research, environmental toxicology, and crop protection.

Editorial Review

Users Review

From reader reviews:

Jason Hill:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make them keep up with the era that is certainly always change and progress. Some of you maybe will update themselves by looking at books. It is a good choice for you but the problems coming to you actually is you don't know what kind you should start with. This The Toxicology and Biochemistry of Insecticides, Second Edition is our recommendation to help you keep up with the world. Why, since this book serves what you want and want in this era.

Graciela Johnson:

Do you have something that you want such as book? The e-book lovers usually prefer to opt for book like comic, quick story and the biggest you are novel. Now, why not hoping The Toxicology and Biochemistry of Insecticides, Second Edition that give your enjoyment preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the way for people to know world considerably better then how they react towards the world. It can't be stated constantly that reading practice only for the geeky particular person but for all of you who wants to be success person. So , for all of you who want to start reading as your good habit, it is possible to pick The Toxicology and Biochemistry of Insecticides, Second Edition become your current starter.

Louise Hawkins:

You could spend your free time to see this book this reserve. This The Toxicology and Biochemistry of Insecticides, Second Edition is simple bringing you can read it in the recreation area, in the beach, train along with soon. If you did not get much space to bring often the printed book, you can buy typically the e-book. It is make you much easier to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

John Sledge:

That publication can make you to feel relax. This particular book The Toxicology and Biochemistry of Insecticides, Second Edition was multi-colored and of course has pictures around. As we know that book The Toxicology and Biochemistry of Insecticides, Second Edition has many kinds or type. Start from kids until teens. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore not at all of book are generally make you bored, any it makes you feel happy, fun and

chill out. Try to choose the best book for yourself and try to like reading that.
