Fireflies, Glow-worms, and Lightning Bugs: Identification and Natural History of the Fireflies of the Eastern and Central United States and Canada (Wormsloe Foundation Nature Book Ser.) By Lynn Frierson Faust

Fireflies, Glow-worms, and Lightning Bugs is the first-ever comprehensive firefly guide for eastern and central North America. It is written for all those who want to know more about the amazing world of lightning bugs and learn the secrets hidden in the flash patterns of the 75+ species found in the eastern and central United States and Canada. As an independent researcher working with numerous university teams, naturalist Lynn Frierson Faust, “The Lightning Bug Lady,” has spent decades tracking the behavior and researching the habitats of these fascinating creatures.

Based on her twenty-five years of fieldwork, this book is intended to increase understanding and appreciation of bioluminescent insects while igniting enthusiasm in a fun and informative way. Species accounts are coupled with historical backgrounds and literary epigraphs to engage and draw readers young and old into the world of these tiny sparklers. A chart documenting the flash patterns of the various species will aid in identification.

Clear photos illustrate the insects’ distinguishing physical characteristics, while habitats, seasonality, and common names are provided in easy-to-understand yet scientifically accurate language. The guide will be welcomed by everyone who wants to learn more about fireflies’ and glow-worms’ unique traits and fragile niche in the ecosystem.

Features:

Over 600 color photographs

Detailed accounts and anatomical diagrams of 75+ species, as well as aids in distinguishing between similar species

A first-of-its-kind flash-pattern chart that folds out on heavy-weight paper

Extensive scientific details written in an understandable and engaging way

Colorful common names?Twilight Bush Baby, Shadow Ghosts, Snappy Syncs, and more?for easy species identification based on flash patterns

Tips on ideal sites and times of year for firefly watching

Conservation-oriented approach

Editorial Review

Review

This is a true gem of a book, a celebration of fireflies in all their diversity. With her unique combination of expert knowledge, boundless enthusiasm, superb photography and above all her love of these magical creatures, Lynn Faust leads us through every aspect of their lives and emphasizes the need to enjoy, study, cherish and protect them. She has created a supremely authoritative yet wonderfully accessible guide that is sure to inspire and inform the next generation of firefly-researchers. This book will draw you into the world of fireflies and make you want to go out into the night to discover and enjoy them for yourself. (John Tyler *Past Fellow of the Royal Entomological Society, and author of The Glow-Worm*)

Lynn Faust's *Fireflies, Glow-worms and Lightning Bugs* is overflowing with contagious enthusiasm for *Lampyridae* and other bioluminescent insects, but you won't want to spill a drop. It is a perfect brew of natural history, anecdote and careful taxonomy, sparkling with accessible-but-authoritative text and saturated with superb photography. *Fireflies, Glow-worms and Lightning Bugs* promises to be a natural history classic, and is a perfect guide to the "magical world of fireflies" in eastern and central North America. (Stephen A. Marshall *author of Flies: The Natural History and Diversity of Diptera*)

This is a book for all of us, from nature enthusiasts and backyard entomologists to beetle experts to theoretical biologists. The guide, as the author modestly calls it, packs a wealth of information and wit. Rigorous but simple, and fun to read. Decades worth of original field observations make Lynn Faust's book a priceless contribution to the study of a charismatic but poorly understood group of insects, nothing short of a scientific monograph. It will be extensively cited in research papers, no doubt?and leave you with a striking impression that fireflies are relevant to the entirety of human experience. Only someone of Lynn's insight and dedication can put humble bugs in a context that wide. She says this is the book she wanted when she first got interested in fireflies. What she came up with is exactly the kind of treatment we want for every group of organisms, to boost and nurture our fascination with nature, to show us how those tiny parts of our world work. I'm afraid, though, this book will remain a unique example for quite a while; people with skill, energy, and expertise matching Lynn's are few and far between. (Vassili Belov *Contributing Editor, BugGuide.net*)

Do you call them fireflies or lightning bugs? Or do you have another name for these insects that are neither bugs nor flies but bioluminescent beetles? A new book, *Fireflies, Glow-worms, and Lightning Bugs*, by Lynn Frierson Faust takes an in-depth look at the biology and allure of these familiar night visitors. Faust is the first to offer a comprehensive look at species of the eastern and central United States. The book is unequivocally the best ever written on North American lightning bugs. . . . Faust's excellent book answers a multitude of questions about these twinkling night travelers. What do they eat? The adults of most species never eat. They only mate. Can fireflies bite us or attack plants in our gardens? Easy answer to both – absolutely not. . . . If nothing else, this book will spark memories of the childhood delight you felt when you caught lightning bugs in a jar – and then let them go. It may also encourage you to turn off the front porch light unless you're expecting visitors. (Whit Gibbons *Aiken Standard*)

But if Faust's book doesn't make the task simple?getting down to species is not a simple job, she admits?having the Lightning Bug Lady by your side, with her graceful, wise, and witty advice, coupled with a plethora of incredible pictures (the cover photo, by David Hughes, of a Big Dipper firefly, a species found

in our area, rocketing upward is itself worth the \$32.95 retail price of the guide), makes the job both doable and downright pleasant. (Bruce Fellman *Naturalist's Journal*)

About the Author

LYNN FRIERSON FAUST is an advisory consultant on firefly studies with state and national parks in Tennessee, South Carolina, Mississippi, Pennsylvania, and New York and an on-site scientific consultant with BBC Nature, the Discovery Channel, and National Geographic, among many other media outlets. She has also aided in identification and educational advisement for the Cincinnati Museum Center and published surveys of the fireflies of Mammoth Cave National Park, Congaree National Park, and the Allegheny National Forest. Faust has presented around the world on the topic of fireflies and published numerous scientific papers. She lives in Knoxville, Tennessee.

Users Review

From reader reviews:

Kathryn Sheffield:

Information is provisions for those to get better life, information nowadays can get by anyone at everywhere. The information can be a information or any news even a huge concern. What people must be consider if those information which is from the former life are difficult to be find than now is taking seriously which one would work to believe or which one the actual resource are convinced. If you find the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take Fireflies, Glow-worms, and Lightning Bugs: Identification and Natural History of the Fireflies of the Eastern and Central United States and Canada (Wormsloe Foundation Nature Book Ser.) as your daily resource information.

Ruth Barnett:

Reading a book for being new life style in this year; every people loves to examine a book. When you go through a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your study, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, in addition to soon. The Fireflies, Glow-worms, and Lightning Bugs: Identification and Natural History of the Fireflies of the Eastern and Central United States and Canada (Wormsloe Foundation Nature Book Ser.) will give you new experience in examining a book.

Cheryl Reese:

As we know that book is important thing to add our expertise for everything. By a book we can know everything we would like. A book is a range of written, printed, illustrated or even blank sheet. Every year has been exactly added. This publication Fireflies, Glow-worms, and Lightning Bugs: Identification and Natural History of the Fireflies of the Eastern and Central United States and Canada (Wormsloe Foundation Nature Book Ser.) was filled regarding science. Spend your spare time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading some sort of book. If you know how big advantage of a book, you can really feel enjoy to read a book. In the modern era like at this

point, many ways to get book that you wanted.

Nancy Bowers:

A lot of reserve has printed but it takes a different approach. You can get it by web on social media. You can choose the best book for you, science, comic, novel, or whatever by means of searching from it. It is called of book Fireflies, Glow-worms, and Lightning Bugs: Identification and Natural History of the Fireflies of the Eastern and Central United States and Canada (Wormsloe Foundation Nature Book Ser.). You can contribute your knowledge by it. Without causing the printed book, it may add your knowledge and make you actually happier to read. It is most critical that, you must aware about guide. It can bring you from one place to other place.
