## Web Programming for Business: PHP Object-Oriented Programming with Oracle By David Paper

*Web Programming for Business: PHP Object-Oriented Programming with Oracle* focuses on fundamental PHP coding, giving students practical, enduring skills to solve data and technical problems in business.

Using Oracle as the backend database, the book is version-neutral, teaching students code that will still work even with changes to PHP and Oracle. The code is clean, clearly explained and solutions-oriented, allowing students to understand how technologies such as XML, RSS or AJAX can be leveraged in business applications. The book is fully illustrated with examples, and includes chapters on:

- Database functionality
- Security programming
- Transformation programming to move data

Powerpoint slides, applied exam questions, and the raw code for all examples are available on a companion website. This book offers an innovative approach that allows anyone with basic SQL and HTML skills to learn PHP object-oriented programming.
