Algebra (Graduate Texts in Mathematics) By *Serge Lang*

This book is intended as a basic text for a one year course in algebra at the graduate level or as a useful reference for mathematicians and professionals who use higher-level algebra. This book successfully addresses all of the basic concepts of algebra. For the new edition, the author has added exercises and made numerous corrections to the text. From MathSciNet's review of the first edition: "The author has an impressive knack for presenting the important and interesting ideas of algebra in just the "right" way, and he never gets bogged down in the dry formalism which pervades some parts of algebra."

Editorial Review

Review

S. Lang

Algebra

"Lang's Algebra changed the way graduate algebra is taught, retaining classical topics but introducing language and ways of thinking from category theory and homological algebra. It has affected all subsequent graduate-level algebra books."?NOTICES OF THE AMS

"The author has an impressive knack for presenting the important and interesting ideas of algebra in just the 'right' way, and he never gets bogged down in the dry formalism which pervades some parts of algebra."?MATHEMATICAL REVIEWS

From the reviews of the third edition:

"The current third edition has grown again ... dealing with topics close to the author's heart from number theory, function theory and algebraic geometry. For the math graduate who wants to broaden his education this is an excellent account; apart from standard topics it picks out many items from other fields This makes it a fascinating book to read ... a very readable treatment of many modern mainline topics as well as some interesting out-of-the-way items." (Paul M. Cohn, Zentralblatt MATH, Vol. 984, 2003)

"Lang's Algebra ... has gained an iconic status, due both to the comprehensiveness of its coverage and its ability to be authoritative and lively at the same time. ... a revolutionary work, changing the way in which graduate algebra was taught. ... the author describes the book as 'very stable', indicating that there is little that he has wished to change. This confidence is reflected in the wider mathematical community, and ... this new printing deserves a place in every university departmental library." (Gerry Leversha, The Mathematical Gazette, Vol. 87 (509), 2003)

From the Back Cover

This book is intended as a basic text for a one-year course in Algebra at the graduate level, or as a useful reference for mathematicians and professionals who use higher-level algebra. It successfully addresses the basic concepts of algebra. For the revised third edition, the author has added exercises and made numerous corrections to the text.

Comments on Serge Lang's Algebra:

Lang's Algebra changed the way graduate algebra is taught, retaining classical topics but introducing language and ways of thinking from category theory and homological algebra. It has affected all subsequent graduate-level algebra books.

April 1999 Notices of the AMS, announcing that the author was awarded the Leroy P. Steele Prize for Mathematical Exposition for his many mathematics books.

The author has an impressive knack for presenting the important and interesting ideas of algebra in just the "right" way, and he never gets bogged down in the dry formalism which pervades some parts of algebra.

Users Review

From reader reviews:

Jeff Farley:

What do you consider book? It is just for students because they are still students or the idea for all people in the world, what the best subject for that? Merely you can be answered for that issue above. Every person has several personality and hobby for every other. Don't to be obligated someone or something that they don't want do that. You must know how great in addition to important the book Algebra (Graduate Texts in Mathematics). All type of book could you see on many sources. You can look for the internet options or other social media.

Kimberley Bailey:

Here thing why this particular Algebra (Graduate Texts in Mathematics) are different and dependable to be yours. First of all studying a book is good but it depends in the content of it which is the content is as delightful as food or not. Algebra (Graduate Texts in Mathematics) giving you information deeper and in different ways, you can find any book out there but there is no publication that similar with Algebra (Graduate Texts in Mathematics). It gives you thrill examining journey, its open up your current eyes about the thing this happened in the world which is perhaps can be happened around you. You can easily bring everywhere like in area, café, or even in your approach home by train. If you are having difficulties in bringing the published book maybe the form of Algebra (Graduate Texts in Mathematics) in e-book can be your option.

Karen Rodriguez:

Information is provisions for individuals to get better life, information these days can get by anyone on everywhere. The information can be a information or any news even a concern. What people must be consider whenever those information which is in the former life are challenging to be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you find the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen within you if you take Algebra (Graduate Texts in Mathematics) as the daily resource information.

Victoria Austin:

The reason? Because this Algebra (Graduate Texts in Mathematics) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will surprise you with the secret the item inside. Reading this book next to it was fantastic author who also write the book in such awesome way makes the content inside of easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of positive aspects than the other book have such as help improving your expertise and your critical thinking means. So , still want to postpone having that book? If I were you I will go to the guide store hurriedly.
