Editorial Review

About the Author

Paul Bradt has a BS in Computer Science from University of Houston Clear Lake. He has worked as a contractor developing various computer program types. He has experimented with the Arduino system and believes it to be an excellent tool for developing an understanding of how electronic components and hardware interact in integrated systems. It is useful as a teaching aid in learning the basics of computer programming. He likes to perform sophisticated troubleshooting of computer problems and has found that the online resources associated with Arduino can be a great help for novice users to get their projects operating quickly and effectively. David Bradt has a BS in Mechanical Engineering from New Mexico State University with many years of experience at NASA and in the Petrochemical Industry. He is also a model railroader and enjoys adding realistic features to his compact HO layout. This is the fourth book the authors have collaborated on. The first book is titled Arduino Heat Transfer Science Fair Projects, the second book is titled Arduino Force Pressure and Acceleration Science Fair Projects, and the third book is titled Arduino Model Railroad signal projects.
